

Invoice for Software Development Services

Client: Gaetano

Developer: Gaetano II

Location: Wilmington, NC

Project Description:

Build a simple, easy-to-use web app that helps manage multiple construction projects. The app will include tools to calculate labor, materials, and project totals, plus a shared list of product codes and prices to use across all projects.

This will save time and reduce mistakes when planning jobs and creating bids. The project will be done over approximately 6 to 8 weeks, working part-time.

Estimated Hours: ~100

Hourly Rate: \$30/hr

Total Due (after 10% opportunity discount): \$2,700

Thank you for the opportunity to work on this project. This rate is fair market value with a modest discount for this unique chance to build something valuable for our family business.

Thank you for your business!
